-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 10 and 14-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Willman in view of Piazza and Bridges.

Willman discloses a beverage heating device, comprising: a boiling container 13; a serving container 15 connected to the boiling container; a first conduit 45 inside the boiling container; and a second conduit 39 inside the serving container and being axially associated with the first conduit.

Piazza discloses that it is known in the art to provide a pressure valve 13 in the side wall of a boiling container 1.

Bridges discloses a serving vessel 12 constructed of aluminum and covered by a plastic 14.

It would have been obvious to one skilled in the art to provide the boiling container of Willman with the pressure valve disclosed in Piazza, and to modify the serving container of Willman with that taught by Bridges, in order to control pressure build up in the boiling and allow for use of the device in a microwave heating environment.

***Allowable Subject Matter***

Art Unit: 1761

Claims 5-9 and 11-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Conclusion**

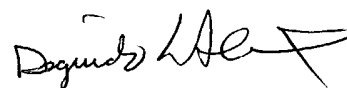

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Pasbrig and McBride are cited for their disclosure of the state of the art.
